User Agency

Middlesex County Sheriff's Office: Brian Gendron, Director of Operations; Diego Barricelli, Facilities Construction Manager; Paul Norton, Special Sheriff

Brief Program Description

This design-build correctional facility project consisted of housing for 256 inmates in four two-tiered, modular cell housing units with all the required program and support spaces. Program spaces were sized to accommodate the entire correctional campus as well as future expansion. The circulation system consisting of ramps, corridors and sallyports were designed for inmate movement between housing units, program space and the existing facility.
